SOUTH ASIA SBCC CONVERSATION

Mobile Vaani

A federated network of Community media platforms

A Voice based alternate media for Social change

Technology can support human development only when people adopt it wholeheartedly.

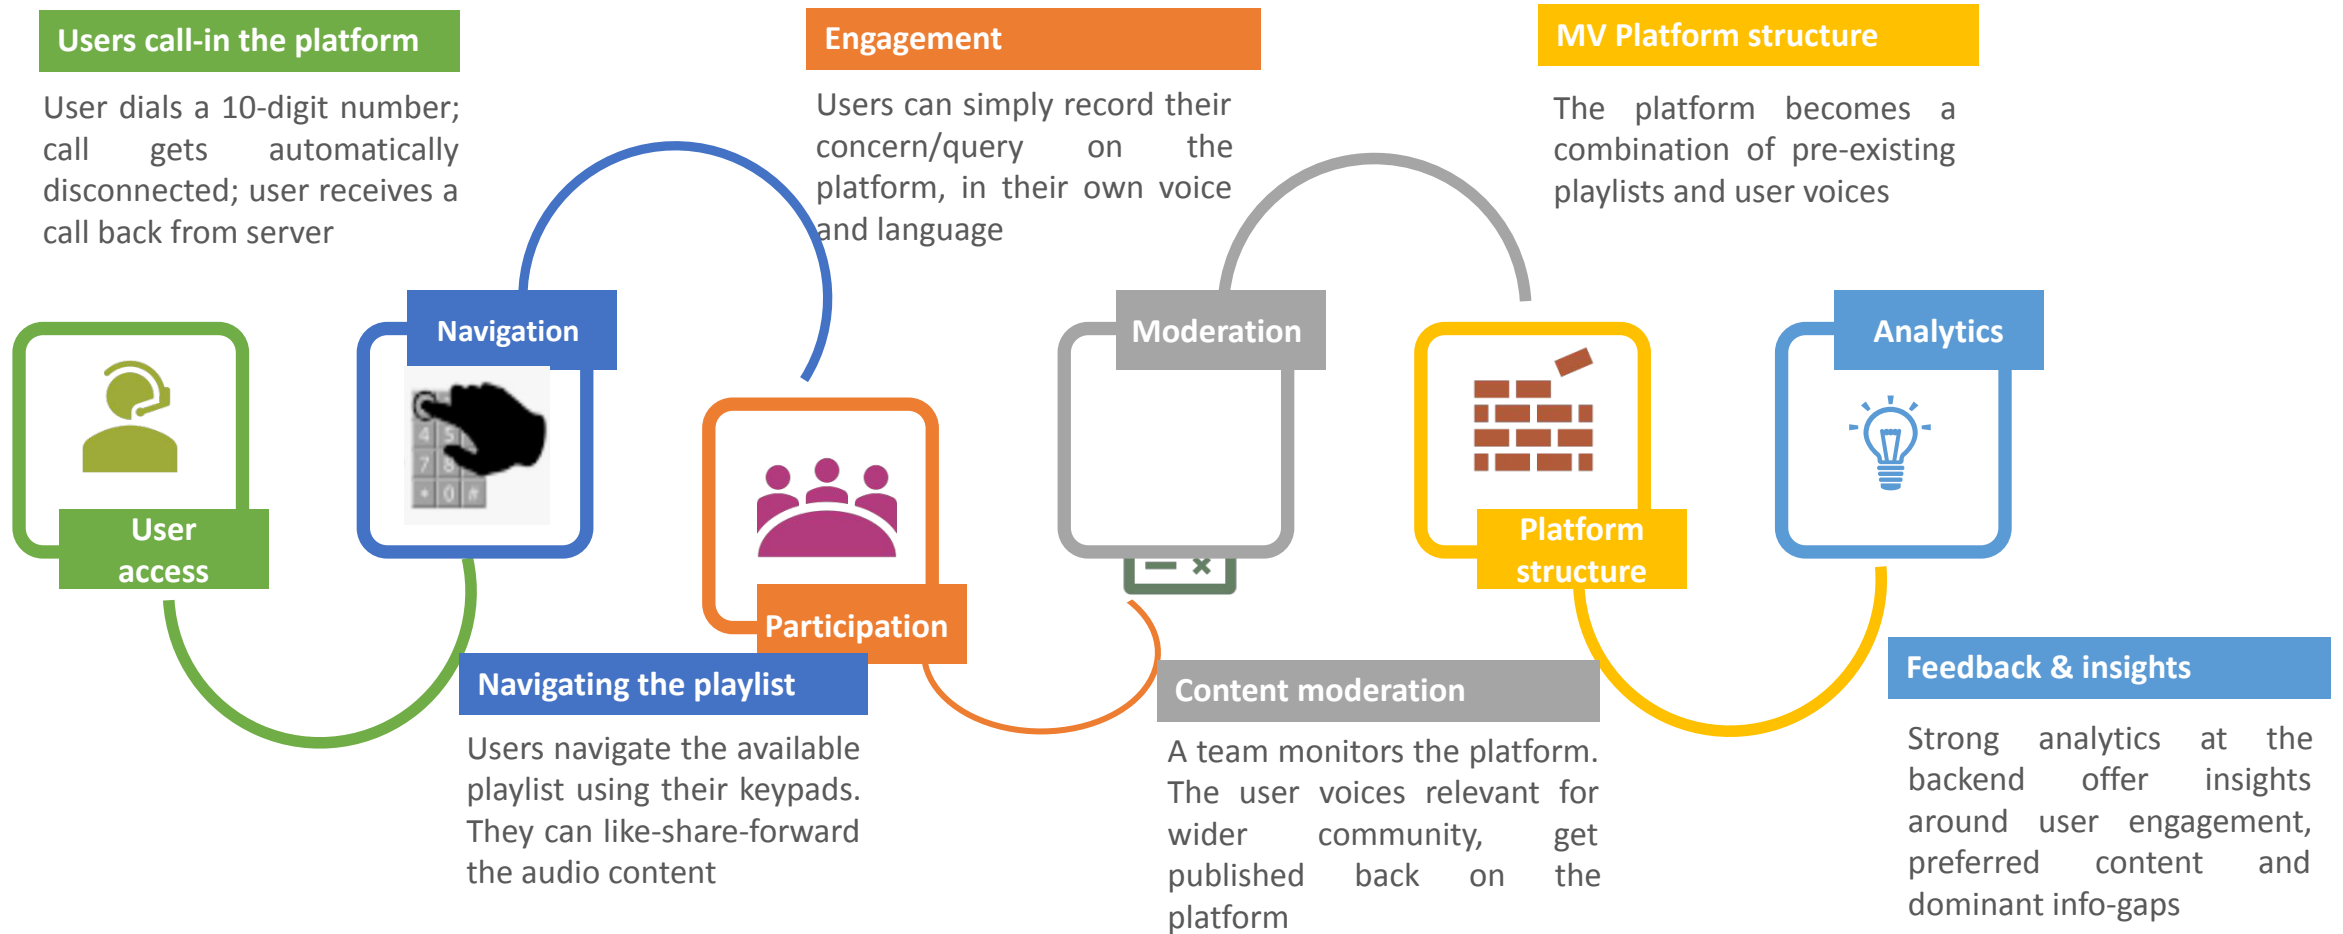

At Gram Vaani, we use technology to create **participatory media platforms** that people find **accessible and adaptable**.

We develop communication platforms where **people whose voices are often unheard can share their opinions, hear from each other, and build communities**. We believe that such **inclusive, bottom-up media platforms**, which are by and for the people, will **build empathetic societies**.

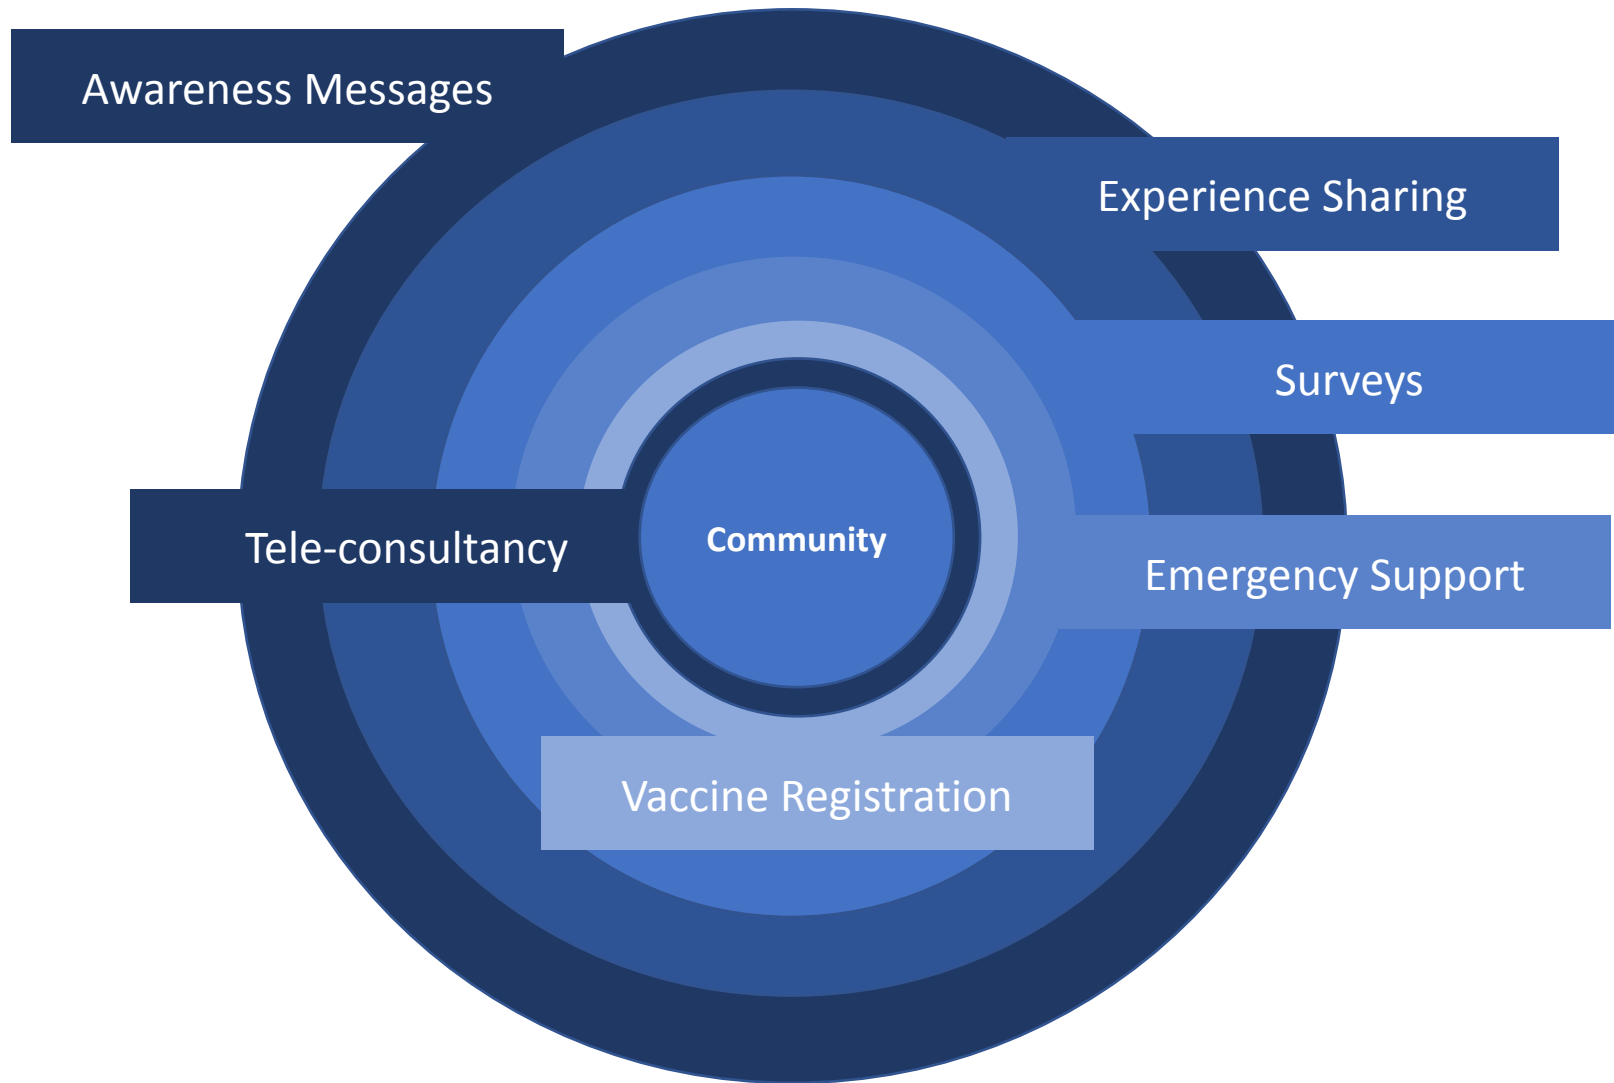

Gram Vaani | 2021

Mobile Vaani – How Does it Work?

Participatory Media for the Community

Campaigns based on communities' requirement

Collaborations toward supporting community

Action based research

Advocacy oriented networks

COVID-19 and Mobile Vaani

- Developed audio messages on government guidelines in 10+ regional languages to build community awareness and counter misinformation.
- Captured community experiences of the lived reality of the COVID-19 outbreak and its influence on social and economic life. In particular, this allowed us to highlight issues faced by migrant workers and rural communities, which prompted a policy response from local administrations and response actors.

Conducted multiple surveys to capture the ground realities, including -

School Reopening Survey

Vaccination Survey

- Health Survey

A three-phased Migrant Workers Survey

COVID-19 Action and Requirement

- State of Provisioning of Relief Services Survey

COVID-19 and Mobile Vaani

- Initiated campaigns on the basis of the findings from the surveys and voice reports, including:
 - Right to Food Campaign
 - Campaign with to assist visually challenged beneficiaries
 - #NotStatusQuo campaign to draw attention towards and address issues with the public distribution system, direct benefit transfers, banking channels
 - Rozi Roti Adhikar campaign, keeping the context of returning migrants in view
- Grievance redressal support and assistance to vulnerable households
- Emergency support such as cash, transportation, ambulances, oxygen, etc. to people requesting for help on our platforms
- Deployed voice based registration system for supporting vaccine registration, especially for those, who were unable to access the online vaccine registration systems themselves
- Coordinated with district level government health committees to organize vaccination camps
- Provided tele-consulting facility through partners such as the Healing Fields Foundation, Basic Health Services, Kshamtalaya, and the Yumetta Foundation, Noorah Health

Dry ration materials received by more than 1000+ beneficiaries

Roadmap

Mobile Vaani

- Deploying a participatory media platform
- Building a community network of volunteers
- Collation of voice reports – Grievances/questions/experiences/views recorded on the Community media platforms

Collaborative response

- A complaints repository
- Survey based finding
- Collective advocacy
- Targeted campaigns

Improve accessibility of MIS

- Using voice technologies linked with IVR systems with real-time data for tracking

Leverage innovative technologies

- Use innovative tech tools like Voice Bot, Voice Based Q&A to improve beneficiary awareness and engagement
